Installing the RI

NOTE: Specific filenames and screens will be different, depending on the actual release being installed. However, installation is the same regardless.

Download the installer:

Access the download server at http://ri.opencable.com/ri/builds/releases/ .

Click on the directory corresponding the the revision you wish to install.

The installer for Windows will be named ocap-ri-tags-<release id>-<subversion rev>-Setup.exe, e.g. ocap-ri-tags-RI_I1_1_4_REL_H-19455-Setup.exe

The installer for Linux will be named ocap-ri-tags-<release id>-<subversion rev>-Linux, e.g. ocap-ri-tags-RI_I1_1_4_REL_H-19505-Linux

NOTE: On Linux, you may need to set the execute flag on the downloaded file.

Double click on the downloaded file. This will start the installer.

(Optionally) Choose the installer language.

	Finish Cance	1

NOTE:Due to a bug in packaging, the CirclesXlet does not run...

Known Linux Related Issues:

1. The Linux installer's execute bit must be set manually before it will run. (e.g. chmod +x ocap-ri-tags-RI_I1_1_4_REL_H-19505-Linux)

2. The DVRX Desktop shortcut does not work in Linux as runRI.sh is used to launch RI in Linux and the runRI.sh script does not have an option for starting DvrExerciser automatically. To start DvrExerciser, user must edit their own hostapp.properties.
