RxProject Follow On Work & Suggestions

1. Add the ability to add an identifier to recordings
2. Explore the use case where the CTP test launches an RI which acts as a server and then the IUT RI acts as a player. Verify the framework can support this.
3. Add socket as an additional interface to RiScriptlet
4. Eliminate code duplication across multiple Xlet by modifying Xlets to use OcapAppDriver.
5. Clean up utils dir, get rid of obsolete classes
